<b>Description</b>			
Hello,			
After updating my playground environment to revision 21289, the database migration command failed with errors:			
<pre>[shortie@centos8 redmine]\$ bundle exec rake db:migrate RAILS_ENV="production" rake aborted! Any workaround for this? Thanks in advance.

## History

### #1 - 2021-11-18 07:04 - Marius BĂLTEANU

Are you using any plugins?

### #2 - 2021-11-18 07:06 - Go MAEDA

It looks like lib/plugins/rfpdf is causing an error, but rfpdf was removed 7 years ago in [r13358](#). The current trunk does not have lib/plugins/rfpdf (see [source:trunk/lib/plugins](#)).

Does removing lib/plugins/rfpd fix the issue?

### #3 - 2021-11-18 17:46 - ChunChang (Nagaharu) Lo

Hi,  
There is no plugin installed and the plugins directory is empty.  
The redmine application is dead now after apache server restarted.  
I will post more information reported by passenger.

### #4 - 2021-11-18 18:09 - ChunChang (Nagaharu) Lo

- *File passenger-error-vMkHbK.html added*

It seems that redmine application can't be started because of missing rfpdf.

### #5 - 2021-11-18 18:22 - ChunChang (Nagaharu) Lo

- *Status changed from New to Resolved*

Ah, sorry, I didn't read your message carefully.  
Yes. Problem was solved by removing the lib/plugins/rpdf directory.

Strangely, this directory dates back to 2013-08-12:  
drwxr-xr-x. 5 apache apache 4096 Aug 12 2013 rfpd

Anyway, thanks a lot. The playground site is back again. :)

- Status changed from Resolved to Closed
- Resolution set to Invalid

Thanks for your feedback.

Nice to see a playground from 2013-08-12.
