

Redmine - Defect #36223

Import from csv problems

2021-11-22 16:10 - Cristian Bazzucco

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Importers	Estimated time:	0.00 hour
Target version:		Affected version:	4.2.3
Resolution:			
Description			
Hi,			
I tried to export from an old redmine version to the last one.			
The import works for every field except for the parent task and related issue.			
What's the correct format to have in this fields?			
check the screenshots			

History

#1 - 2021-11-22 16:55 - Cristian Bazzucco

Additional info: adding the unique id seems to work.

- the parent task need to be formatted as the task number in the csv
- the related issue field need to be placed in his own column with the issue number
- same for block etc. each with his own subcolumn.

maybe the redmine export need to be implemented to fit the import requirement? (I tested a export-import before writing this sentence)
