Target version: 5.0.0	
Resolution: Fixed	

Description

Set **lazy: loading** for images and thumbnail images that Redmine will display as follows:

lazy loading document: https://developer.mozilla.org/en-US/docs/Web/Performance/Lazy_loading

It can be displayed more quickly, for example, when a issue has many comments and many images are displayed.

Lazy load inline images (#36294).

Patch by Mizuki ISHIKAWA.

History

#1 - 2021-12-09 02:29 - Mizuki ISHIKAWA

- File *feature-36294.patch* added

I'll attach the patch.

#2 - 2021-12-09 05:40 - Go MAEDA

- Category changed from *UI* to *Performance*

+1

Currently, inline images on a page are loaded all at once. After enabling lazy loading by applying the patch, images are loaded when it is necessary.

Lazy loading reduces the transfer volume of images and makes the load speed of a page. It resolves the problem that long issues or wiki pages with a lot of images take a long time to load and should improve the user experience.

#3 - 2021-12-09 10:16 - Go MAEDA

- Target version set to *Candidate for next major release*

#4 - 2021-12-12 06:01 - Go MAEDA

- Subject changed from *Change image loading to lazy loading* to *Lazy load inline images*

- Target version changed from *Candidate for next major release* to *5.0.0*

Setting the target version to 5.0.0.

#5 - 2021-12-14 02:27 - Go MAEDA

- Status changed from New to Closed
- Assignee set to Go MAEDA
- Resolution set to Fixed

Committed the patch. Thank you for your contribution.
