

Redmine - Defect #36377

Encoding drop-down in the import settings defaults to US-ASCII instead of general_csv_encoding in Korean, Thai, and Shimplified Chinese

2022-01-01 08:32 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Target version:	5.0.0	Affected version:	
Resolution:	Fixed		

Description

The "Encoding" drop-down is supposed to default to the encoding defined by general_csv_encoding in config/locales/*.yml files. For example, it should default to "ISO-8859-1" when the language of your account is English.

However, the drop-down always defaults to "US-ASCII" regardless of general_csv_encoding if the language of the current user is Korean (ko), Thai (th), or Simplified Chinese (zh).

This is because the value of general_csv_encoding in those languages is not found in Setting::ENCODINGS in app/models/setting.rb.

Language	general_csv_encoding	How to fix
Korean	CP949	Add CP949 to Setting::ENCODINGS
Thai	Windows-874	Add Windows-874 to Setting::ENCODINGS
Simplified Chinese	gb18030	Change general_csv_encoding in zh.yml from gb18030 to GB18030
