Redmine - Defect #36393
Mailer.with_synched_deliveries doesn't correctly detect other async Queue adapters
2022-01-06 15:54 - Felix Schäfer

Status: Closed
Priority: Normal
Assignee: Go MAEDA
Category: Email notifications
Target version: 5.0.0
Resolution: Fixed

Description
Mailer.with_synched_deliveries source:/trunk/app/models/mailer.rb@21350#L639 will not detect other async queue adapters than the Rails core ActiveJob::QueueAdapters::AsyncAdapter (such as those used by external queuing systems such as the DelayedJobAdapter, ResqueAdapter or SidekiqAdapter).

With these queue adapters in normal use, Mailer.with_synched_deliveries does nothing. This can lead to problems as it is expected that email deliveries (in our case daily reminders) would run inline but instead they were attempted to be scheduled using the normal queue adapter.

Associated revisions
Revision 21362 - 2022-01-12 16:13 - Go MAEDA
Mailer.with_synched_deliveries doesn't correctly detect other async Queue adapters (#36393).

Patch by Felix Schäfer.

History
#1 - 2022-01-06 15:56 - Felix Schäfer
- File 36393-synched_deliveries_always_inline.patch added

The attached patch simply removes the check for the ActiveJob::QueueAdapters::AsyncAdapter. This ensures deliveries in this context are always inline without trying to be clever about it.

#2 - 2022-01-06 17:06 - Holger Just
- Description updated
- Status changed from New to Confirmed

#3 - 2022-01-06 17:13 - Holger Just
- Related to Defect #36395: Mailer.with_synched_deliveries is not thread-safe added

#4 - 2022-01-11 00:33 - Go MAEDA
- Target version set to 5.0.0

Setting the target version to 5.0.0.
Committed the patch. Thank you.
