Target version:	4.2.4			
Resolution:	Fixed		Affected version:	

Description

Autocomplete is broken when bulk adding watchers for issues from different projects.

How to reproduce:

1. Open /issues.
2. Select two issues from different projects.
3. Press RMB.
4. Watchers => Add.
5. List of users will be shown.
6. Try to filter users.

This is happens because WatchersController can't find project for New and Autocomplete_for_user actions and authorize a user.
