Resolution:	Fixed		
Description In our Redmine installation we have both local users and users from our LDAP service. It would be very helpful for our user management if we could filter for "auth_source_id" in a GET request for the endpoint /users.:format. Example: GET /users.json?limit=100&auth_source_id=1

- Related to Feature #23307: Include auth_source field in User API response added
- #2 - 2023-03-14 15:17 - Joan J
- There's a patch in the related feature #23307, could that be included in next release?
- #3 - 2024-01-25 17:44 - Marius BĂLTEANU
- Status changed from New to Closed
- Assignee set to Marius BĂLTEANU
- Resolution set to Fixed
- Starting with Redmine 5.1 (#37674) you can now filter for auth_source_id using the same syntax that exists for other entities. The one pointed by you should work as expected.
