

Redmine - Defect #3670

SVN repository: missing config/initializers/session_store.rb

2009-07-25 11:48 - Andreas Deininger

Status:	Closed	Start date:	2009-07-25
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

Came across that while updating my redmin instance to svn revision 2824:

<http://www.redmine.org/news/show/22> states:

```
A rake task was added to make this step easier. You just need to run the following command from your Redmine directory:
rake config/initializers/session_store.rb
```

However, I couldn't find the file session_store.rb neither in my trunk checkout nor anywhere else in the Redmine SVN repository.

Am I overlooking something?

Just in case anyone else runs into that problem:

I resolved my problem by manually adding the line below to the file config/environemnt.rb. (That's what is supposed to be done by the rake command).

```
config.action_controller.session = {
  :session_key => '_scotfurs_site_session',
  :secret      => 'abcdef...'
}
```

History

#1 - 2009-07-25 17:16 - Mischa The Evil

- Status changed from New to Closed
- Resolution set to Invalid

Look at [source:/trunk/lib/tasks/initializers.rake](#). If you run the command rake config/initializers/session_store.rb the preceding rake-task generates the secret-key and writes it to the (automatically generated) ../config/initializers/session_store.rb-file.

Mischa.
