

Redmine - Defect #36721

Redmine 4.2.4 installation failure, reason: tar.gz archive broken

2022-03-01 17:37 - Andreas Deininger

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Marius BĂLTEANU	% Done:	0%
Category:	Website (redmine.org)	Estimated time:	0.00 hour
Target version:		Affected version:	4.2.4
Resolution:	Fixed		
Description			
<p>When trying to update my Redmine instance to latest version 4.2.4, I encountered the following error:</p> <p>Download page</p> <p>From there, I downloaded redmine-4.2.4.tar.gz (sha256: 7f50fd4a6cf1c1e48091a87696b813ba264e11f04dec67fb006858a1b49a5c7d)</p> <p>When running the command <code>bundle exec rake generate_secret_token</code>, I was confronted with an error.</p> <p>Reason:</p> <p>The downloaded file has artifacts. Take a look at the root level:</p> <pre>PaxHeader redmine-4.2.4</pre> <p>What is this PaxHeader directory for? Please note that this PaxHeader directory can be found not only on the root level, but also in various levels below, e.g.:</p> <pre>redmine-4.2.4\lib\PaxHeader\</pre> <p>Inside this directory I see various file with strange content, e.g. tasks with content:</p> <pre>17 gid=532141437 17 uid=532141437 27 mtime=1630962034.519262</pre> <p>These files cause installation to fail.</p> <p>As workaround, I downloaded the .zip file redmine-4.2.4.zip instead and could install Redmine without problems.</p>			

History

#1 - 2022-03-02 19:38 - Marius BĂLTEANU

- Category set to Website (redmine.org)
- Status changed from New to Closed
- Assignee set to Marius BĂLTEANU
- Resolution set to Fixed

The releases are now available in the [releases](#) page and the [Download](#) page was updated to point to them. The archives attached to the Download page were just a temporary workaround (please see the [news](#) post).
