

Redmine - Defect #36772

Private notes are visible for users when the option isn't activated

2022-03-16 14:26 - eric c

Status:	Needs feedback	Start date:																									
Priority:	Normal	Due date:																									
Assignee:		% Done:	0%																								
Category:	Permissions and roles	Estimated time:	0.00 hour																								
Target version:		Affected version:	4.2.1																								
Resolution:																											
Description																											
<p>Hi,</p> <p>We have created users where the options "view private notes" (view_private_notes) is unchecked on the roles page. When the user logs in he can see the private notes...</p> <p>Can't find an issue regarding this problem, so I've created this one :)</p> <p>This are the issue tracking settings: settings.png</p> <p>The role setting regarding issues is: role[issues_visibility] : default (all non private issues)</p> <p>This is the used configuration:</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>4.2.1.stable</td></tr><tr><td>Ruby version</td><td>2.7.4-p191 (2021-07-07) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>5.2.5</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr><tr><td>Mailer queue</td><td>ActiveJob::QueueAdapters::AsyncAdapter</td></tr><tr><td>Mailer delivery</td><td>smtp</td></tr></table> <p>SCM:</p> <table><tr><td>Subversion</td><td>1.10.4</td></tr><tr><td>Mercurial</td><td>4.8.2</td></tr><tr><td>Bazaar</td><td>2.8.0</td></tr><tr><td>Git</td><td>2.20.1</td></tr></table> <p>Filesystem</p> <p>Redmine plugins:</p> <table><tr><td>issue_recurring</td><td>1.6</td></tr></table> <p>I hope this is all the info that is needed to solve to problem. In case there are questions, let me know :)</p> <p>Thanks so far!</p>				Redmine version	4.2.1.stable	Ruby version	2.7.4-p191 (2021-07-07) [x86_64-linux]	Rails version	5.2.5	Environment	production	Database adapter	Mysql2	Mailer queue	ActiveJob::QueueAdapters::AsyncAdapter	Mailer delivery	smtp	Subversion	1.10.4	Mercurial	4.8.2	Bazaar	2.8.0	Git	2.20.1	issue_recurring	1.6

History

#1 - 2022-03-22 18:43 - Holger Just

- Status changed from New to Needs feedback

Users can have multiple roles in a project. If any of those roles allows the user to see private notes, they can see them in the project.

In addition to that, a user is always able to see their own notes, even if the note is private and they are not allowed to see private notes in general.

Please verify this. If you still find this to be an issue, please describe your setup with more details which would allow us to recreate what you see based on an empty/new Redmine installation.

#2 - 2022-04-26 13:14 - eric c

Took me some time to give a reaction...

The affected user has access to multiple projects, access is set using the a specific group.

Projects that are connected all have the same rol (external user).

The "external user" role isn't allowed to view, add or edit private notes. It is the same with the issue, the user can't change it into private.
