<b>Description</b> Hello,  The function copyImageFromClipboard) targets the first file input of the page and may conflict with other plugins. On our redmine instance we use the redmine_comments plugin ( <a href="https://github.com/jbbarth/redmine_comments">https://github.com/jbbarth/redmine_comments</a> ) that adds the ability to write private note and create a new form. We experienced a problem as shown in the image1 and image2 ,and when we click on comment as shown in image3 We managed to fix this issue, by replace the line `var inputEl = \$('input:file.filedrop').first();` by `var inputEl = \$(this).closest("form").find('input:file.filedrop');`  Thank you for your help

Hello  
Did you install the plugin (redmine\_tiny\_features)?  
Because the bug is fixed by overriding the method (copyImageFromClipboard).

I only tried to install [https://github.com/jbbarth/redmine\\_comments](https://github.com/jbbarth/redmine_comments) and I saw a new role permission, but nothing else in the UI.
