

Redmine - Patch #36824

Allow to filter issues by its version status with shared versions

2022-03-22 12:16 - Holger Just

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Marius BĂLTEANU	% Done:	0%
Category:	Issues filter	Estimated time:	0.00 hour
Target version:			
Description			
<p>Right now, when filtering issues by the status if its assigned version, the search for eligible versions is restricted to the projects of the issue query (i.e. the current project plus potentially selected subprojects). The fixed version of an issue within the project scope however can be shared from a lot of other unrelated projects which are not in the scope for issues for the query (e.g. from any project with the "system" sharing).</p> <p>The attached patch against the current trunk fixes the search for eligible versions to also show issues with a version from different projects.</p>
