

Redmine - Feature #37099

Add regexps to parse more SCM messages

2022-05-09 18:00 - Beni br

Status:	New	Start date:

Category:	SCM	Estimated time:	0.00 hour
Target version:			
Resolution:			
<b>Description</b> We are using commit messages like feature/#ID-sometext or feature/#ID_sometext where ID is a Redmine issue ID. Currently Redmine does not add commits with such messages to the associated revisions because of the / before the #ID. Also these strings will not have a clickable link to the issue id because the the - or _ behind the #ID. With this patch Redmine will add such commits to an issues revisions and also the #ID in the message will become a clickable link.			

History

#1 - 2022-05-09 18:01 - Beni br

Example:  
feature/#37099-sometext  
feature/#37099\_sometext

#2 - 2022-07-04 16:46 - Go MAEDA

I think the patch can be committed if tests are added.
