| **Target version:** | | | | |
| **Resolution:** | Invalid | | **Affected version:** | 5.0.1 |

**Description**

I'm working with https://hub.docker.com/_/redmine images.

```
docker pull redmine:5.0.1
```

Unfortunately, this image doesn't work with the following error. Viewing the error: **docker logs <container_name>**

```
Your Gemfile lists the gem puma (>= 0) more than once.
You should probably keep only one of them.
Remove any duplicate entries and specify the gem only once.
While it's not a problem now, it could cause errors if you change the version of one of them later
.
The Gemfile's dependencies are satisfied
rake aborted!
failed to get urandom

<internal:/usr/local/lib/ruby/3.1.0/rubygems/core_ext/kernel_require.rb>:85:in `require'
/usr/src/redmine/Rakefile:5:in `<top (required)>'
(See full trace by running task with --trace)
```

Do you support these images? How to fix the problem?

---

**History**

#### #1 - 2022-05-19 01:40 - Go MAEDA

*- Status changed from New to Closed*

*- Resolution set to Invalid*

Unfortunately, the Docker image is not maintained by us and has nothing to do with www.redmine.org. Please report the issue to https://github.com/docker-library/redmine/issues.

#### #2 - 2022-05-19 14:18 - Darksidds Darksidds
