

Redmine - Patch #37155

Issue#last_notes fallback does not respect notes visibility

2022-05-24 12:32 - Jens Krämer

Target version:	4.2.7		
Description In Issue#last_notes there is a fallback for the case that the @last_notes instance variable has not been preloaded by Issue.load_visible_last_notes. This fallback does not filter journals by visibility, leading to possible unwanted disclosure of notes marked 'private'. I don't think this is an issue in the current Redmine code base as the fallback is never hit (I think), but in plugins, it might be triggered. The attached patch adds a .visible to the scope used to find the relevant journal.
