Category:	REST API	Estimated time:	0.00 hour
Target version:			
Resolution:	Wont fix		
<b>Description</b> Currently, filtering issues by multiple tracker ids is possible with analyzing issues query filter. <ul style="list-style-type: none"><li>• <a href="http://localhost:3000/issues?f%5B%5D=tracker_id&amp;op%5Btracker_id%5D=%3D&amp;v%5Btracker_id%5D%5B%5D=1&amp;v%5Btracker_id%5D%5B%5D=2&amp;v%5Btracker_id%5D%5B%5D=3">http://localhost:3000/issues?f%5B%5D=tracker_id&amp;op%5Btracker_id%5D=%3D&amp;v%5Btracker_id%5D%5B%5D=1&amp;v%5Btracker_id%5D%5B%5D=2&amp;v%5Btracker_id%5D%5B%5D=3</a></li></ul> But building above URL path is not strait forward, and it's preferable to support like the following understandable parameter. <ul style="list-style-type: none"><li>• <a href="http://localhost:3000/issues.json?tracker_id=1,2,3">http://localhost:3000/issues.json?tracker_id=1,2,3</a></li><li>• (On current trunk, this request returns 500 Internal Server Error)</li></ul> Attached patch file enables above simple and understandable multiple tracker ids filter issues request. Note that this patch was made by @rbt, <a href="#">Takashi Kato</a> , @mbasa and me from Redmine patch meetup 14th.			

History

#1 - 2022-05-27 16:06 - Ko Nagase

- File 0001-rest-api-filter-issues-by-multiple-tracker-ids.patch added

#2 - 2022-06-19 22:11 - Marius BĂLTEANU

- Target version set to Candidate for next major release

#3 - 2024-01-24 04:04 - Marius BĂLTEANU

- Status changed from New to Needs feedback

- Target version deleted (Candidate for next major release)

Indeed, the long syntax is not so user friendly, but you can use the short filters. For example, the same behaviour can be obtained using the following query: issues.json?tracker\_id=2|3 which will return all issues with tracker\_id=2 or tracker\_id=3. The delimiter operator is "|" and not ",".

Can you test and let me know if it works for you?

#4 - 2024-01-24 04:04 - Marius BĂLTEANU

This is available for all fields that support "is" operator, not only for tracker\_id.

#5 - 2024-02-10 11:36 - Marius BĂLTEANU

- Tracker changed from Patch to Feature

- Status changed from Needs feedback to Closed

- Resolution set to Wont fix

Closing this.

[Ko Nagase](#), please reopen if the current implementation does not cover your requirements.

Sorry for the late reply.  
I confirmed that "|" works as expected.  
Probably, the following add\_short\_filter seems to be the trick ?  
<https://www.redmine.org/projects/redmine/repository/svn/entry/trunk/app/models/query.rb#L734>

Anyway, thanks for the information!

Yes, that it is.
