

Redmine - Patch #37167

REST API: Filter issues by multiple tracker ids

2022-05-27 16:05 - Ko Nagase

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:	Candidate for next major release		

Description

Currently, filtering issues by multiple tracker ids is possible with analyzing issues query filter.

-

http://localhost:3000/issues?f%5B%5D=tracker_id%38;op%5Btracker_id%5D=%3D%38;y%5Btracker_id%5D%5B%5D=1%38;y%5Btracker_id%5D%5B%5D=2%38;y%5Btracker_id%5D%5B%5D=3

But building above URL path is not strait forward, and it's preferable to support like the following understandable parameter.

- http://localhost:3000/issues.json?tracker_id=1,2,3
- (On current trunk, this request returns 500 Internal Server Error)

Attached patch file enables above simple and understandable multiple tracker ids filter issues request.

Note that this patch was made by @rbt, @tohosaku, @mbasa and me from Redmine patch meetup 14th.
