

Redmine - Defect #37192

Missing datepicker-en-US.js

2022-06-02 07:31 - Aleksandar Pavic

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	l18n	Estimated time:	0.00 hour
Target version:		Affected version:	4.1.7
Resolution:			
Description			
when /projects URL is accessed, and english by default installation is used, this occurs in log file			
<code>ActionController::RoutingError (No route matches [GET] "/javascripts/i18n/datepicker-en-US.js"):</code>			
I have resolved the issue by copying existing GB file to /public/javascripts/i18n/datepicker-en-GB.js to /public/javascripts/i18n/datepicker-en-US.js			
Since I cannot find another english file...			
Perhaps some native USA English speaker should review file and propose changes if any, then submit here for bugfix...
