Redmine - Defect #37229

Ignore workflow transitions that already defined and now is not appliable

2022-06-09 13:43 - salman mp

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues workflow		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	

Description

Suppose some workflow transitions defined for one role. Then if permissions of add_issues and edit_issues removed for that role, Admin can see their transitions related statuses as allowed new statuses, when editing an issue.
There is no way to remove that transitions (except adding permission of add/edit to role temporarily), because in workflow transition edit page, only roles that can add and edit issues are listed.

Confirmed the issue.

Here are the steps I tried:

1. Load the bundled test fixture by running `bin/rails db:fixtures:load`
2. Remove "Add issues" and "Edit issues" permission from "Manager" role
3. Go to /workflows/edit page. "Manager" does not appear in "Role" drop-down
