

Redmine - Feature #37279

Reject passwords that are the same as login, first name, or last name

2022-06-24 04:08 - Go MAEDA

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
Some lazy users may use their login IDs or their names as passwords. This can be a security threat.			
Such passwords should always be rejected.			

History

#2 - 2022-07-09 09:08 - Go MAEDA

- File 37279.patch added

The attached patch adds User#test_validate_password_complexity. It rejects passwords that are the same as the user's login, first name, last name, or email for now. I think it would be great if the method is extended to also reject passwords with dictionary words in the future.
