| Target version: | 6.0.0 | | |
| Resolution: | Fixed | | |
| Description | | | |
| Some lazy users may use their login IDs or their names as passwords. This can be a security threat. | | | |
| Such passwords should always be rejected. | | | |

Associated revisions

Revision 22888 - 2024-06-21 07:32 - Go MAEDA

Reject passwords that are the same as login, first name, last name, or email (#37279).

Patch by Go MAEDA (@maeda).

Revision 22893 - 2024-06-22 09:35 - Go MAEDA

Update locales (#37279).

History

#2 - 2022-07-09 09:08 - Go MAEDA

- File 37279.patch added

The attached patch adds User#test_validate_password_complexity. It rejects passwords that are the same as the user's login, first name, last name, or email for now. I think it would be great if the method is extended to also reject passwords with dictionary words in the future.

#3 - 2022-07-09 09:14 - Go MAEDA
