<b>Target version:</b>	4.2.8	<b>Affected version:</b>	4.2.7
<b>Resolution:</b>	Fixed		

**Description**

This was discovered during the investigations for [#36940](#).

Steps to reproduce:

1. Create a **user** custom field **A** of type float and check *Used as a filter*
2. Create an **issue** custom field **B** with format **User** and check *Used as a filter*
3. On the *My account* page set the custom value **A** for your own account to an arbitrary value
4. Filter the issue list by the filter **B's A** and use the value you set on the *My account* page

Observe that the page returns 500 error with the following error in logs:

```
Query::StatementInvalid: PG::UndefinedFunction: ERROR: operator does not exist: text >= numeric
LINE 1: ...' AND custom_field_id=12 AND custom_values.value BETWEEN 32...
                                ^
```

HINT: No operator matches the given name and argument types. You might need to add explicit type casts.

#### Associated revisions

##### Revision 21684 - 2022-06-27 19:58 - Marius BĂLTEANU

Fix filter for chained User custom fields returns 500 internal server error when filtering after a float value (#37349).

##### Revision 21685 - 2022-06-27 20:01 - Marius BĂLTEANU

Revert undesired change (#37349).

##### Revision 21688 - 2022-06-28 08:47 - Marius BĂLTEANU

Merged r21684 and r21685 to 5.0-stable (#37349).

##### Revision 21689 - 2022-06-28 08:48 - Marius BĂLTEANU

Merged r21684 and r21685 to 4.2-stable (#37349).
