Redmine - Defect #3753

Plugin asset URLs not correctly generated for sub-URI deployments

2009-08-18 15:18 - John Koleszar

Status:	Closed		**Start date:**	2009-08-18
Priority:	Normal		**Due date:**	
Assignee:	Eric Davis		**% Done:**	0%
Category:	Plugin API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate		**Affected version:**	

Description

When Redmine is installed in a sub-uri (eg www.example.org/redmine), the URLs generated for plugin assets do not prepend the relative_url_root. Strictly speaking, this is a bug in the Engines plugin, not Redmine, but there has been no response to my report on the Engines developers' list[1].

History

#1 - 2009-09-01 05:25 - Eric Davis

When Redmine is upgraded for Rails 2.3.3 (#3597), we'll probably need to upgrade Engines also. If the bug still exists, I can try to fix it for Redmine and send it to the Engines team.

#2 - 2010-09-17 06:23 - Eric Davis

- Status changed from New to Closed

- Resolution set to Duplicate

Was fixed in #3935, marking this as a duplicate.
