

## Redmine - Defect #37539

### Issue index filtering with custom field became unusable with Redmine 4.2.7

2022-08-02 23:45 - Onur Küçük

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Issues filter	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	4.2.7
<b>Resolution:</b>	Duplicate		
<b>Description</b>			
<p>When running an issue query with a custom field used on filtering, the query result that used to take about 72ms now takes 85652ms, rendering the page unusable on Redmine 4.2.7.</p> <p>Reverting this change <a href="https://github.com/redmine/redmine/commit/00c1e3528f09a1b83ef7bdf0f3d231de4dff9450">https://github.com/redmine/redmine/commit/00c1e3528f09a1b83ef7bdf0f3d231de4dff9450</a> or even only reverting the issue_custom_field.rb change (removing issue visibility condition) makes the performance like 4.2.6. See the attached logs for details. Note that the custom field 105 in this example is a boolean issue custom field, but this issue does not seem to be related to the type of the custom field.</p> <pre>sh: hg: command not found sh: bsr: command not found Environment:   Redmine version      4.2.7.stable   Ruby version         2.7.6-p219 (2022-04-12) [x86_64-linux]   Rails version        5.2.8   Environment          production   Database adapter      PostgreSQL   Mailer queue         ActiveJob::QueueAdapters::AsyncAdapter   Mailer delivery      smtp SCM:   Subversion           1.14.1   Cvs                   1.12.13   Git                   2.35.3   Filesystem Redmine plugins:   no plugin installed</pre> <p>Using Postgresql 14.4 but note that this is reproducible on different environments with (minor) different versions of Postgresql Ruby etc.</p>
