

## Redmine - Defect #37550

### Accessibility, formatting buttons: focus order / accessibility label

2022-08-04 11:13 - Johannes Fischer - dzb lesen

|   |                 |                          |           |
|---|-----------------|--------------------------|-----------|
| <b>Status:</b>  | New             | <b>Start date:</b>       |           |
| <b>Priority:</b>  | Normal          | <b>Due date:</b>         |           |
| <b>Assignee:</b>  |                 | <b>% Done:</b>           | 0%        |
| <b>Category:</b>  | Text formatting | <b>Estimated time:</b>   | 0.00 hour |
| <b>Target version:</b>  |                 | <b>Affected version:</b> | 4.2.7     |
| <b>Resolution:</b>  |                 |                          |           |
| <b>Description</b>  |                 |                          |           |
| <p>Editing of issues, forum messages: The focus order (using tab key) of formatting buttons (above description textarea) is wrong. Reason: There are attributes <b>tabindex="200"</b> on the &lt;button&gt; elements in HTML. Can you please <b>delete those tabindex-attributes</b> (or set the value to "0")? It's important for users with mobility impairments who use only a keyboard for navigation, as with <b>tabindex=200</b> the focus navigates first through the formatting buttons and after through all other interactive elements of the website.</p> <p>Additionally those buttons have only an attribute title as accessibility label. Blind users work with a screenreader, but a screenreader does not read out a title always for sure. Please add an <b>attribute aria-label</b> with same content, for example <b>aria-label="Strong"</b> where you have <b>title="Strong"</b>.</p> |                 |                          |           |
