<b>Target version:</b>		<b>Affected version:</b>	5.0.1
<b>Resolution:</b>	Invalid		

**Description**

When upgrading a redmine 4.1.1 to 5.0.1, the filters and options displays don't work.

I have a 4.1.1 which had plugins installed. After uninstalling all plugins, I dumped the db and saved the schema.db.

On a different machine+os, I installed 5.0.1, reloaded the saved db, copied the saved schema.rb, and did a migrate. The resulting rm appears to work ok (I have only done minimal testing), except that when you click on the "Issues" tab for a project:

1. The checkbox, "Status" & "Open" dropdown does not appear below "Filters"
2. Clicking on the "Filters" label has no affect;
3. The add filter dropdown displays, but adding a filter does not add anything to the filters display.
4. Clicking on "Options" has no effect.  
(Clicking "New issue" seems to work.)

4.1.1 system:

```
redmine 4.1.1
rails 5.2.4.2
mysql 5.7
ruby 2.6.6-p46
ubuntu-18.04
```

5.0.1 system:

```
redmine 5.0.1
rails 6.1.6
mysql 5.7
ruby 3.0.4-p208
ubuntu-20.04
```

A diff of the migrated schema.db and the 4.1.1 schema.db shows many lines of the form:

```
15c15
< create_table "accounts", id: :integer, charset: "utf8mb4", force: :cascade do |t|
---
> create_table "accounts", id: :integer, options: "ENGINE=InnoDB DEFAULT CHARSET=utf8mb4", force
: :cascade do |t|
```

and a few like:

```
105c105
< t.text "filter", size: :medium
---
> t.text "filter", limit: 16777215
```

```
144,145c144,145
< t.text "path", size: :medium, null: false
< t.text "from_path", size: :medium
---
> t.text "path", limit: 16777215, null: false
> t.text "from_path", limit: 16777215
```

164c164

```
< t.text "comments", size: :long
---
> t.text "comments", limit: 4294967295
```

## History

---

### #1 - 2022-08-20 02:45 - Gary Aitken

- Status changed from *New* to *Resolved*

I am not sure what caused the above problem, but I **think** it may be related to using chruby as the ruby manager. I removed chruby and related cruft, including rubies; then installed as root I installed rvm, ruby 3.0.4, and passenger 6.0.14. As a normal user I then installed ruby 3.0.4 and redmine and all seems fine.

### #2 - 2022-08-20 06:11 - Mischa The Evil

- Status changed from *Resolved* to *Closed*

- Resolution set to *Invalid*

Thanks for the feedback.
