

Redmine - Patch #37599

Remove extra call of Attachment#thumbnailable? in AttachmentsController#thumbnail

2022-08-23 17:01 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	5.1.0		

Description

In AttachmentsController#thumbnail, you can find the following code. It checks the return value of @attachment.thumbnailable?.

```
def thumbnail
  if @attachment.thumbnailable? && tbnail = @attachment.thumbnail(:size => params[:size])
```

However, it is unnecessary because Attachment#thumbnailable? is also called in Attachmnet#thumbnail as follows.

```
def thumbnail(options={})
  if thumbnailable? && readable?
```

Therefore, we can safely remove the call of Attachment#thumbnailable?. See the patch below.

```
diff --git a/app/controllers/attachments_controller.rb b/app/controllers/attachments_controller.rb
