Redmine - Defect #37603

Missing translation for label_default_queries.for_this_user

2022-08-24 19:53 - Holger Just

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Go MAEDA	**% Done:**	0%
Category:	Translations	**Estimated time:**	0.00 hour
Target version:	5.0.3		
Resolution:	Fixed	**Affected version:**	

Description

In #7360 we introduced default issue queries.

Admins can edit the default issue query for other users in Administration -> Users -> [User] -> Default issue query. Here (specifically in UsersHelper#default_issue_query_options), we attempt to use the I18n key label_default_queries.for_this_user which is however missing in the original patch for #7360.

This patch adds the missing I18n keys for English and German. It should apply both to trunk and 5.0-stable.
