

Redmine - Patch #37608

Check visibility for passed user in IssueQuery.default

2022-08-25 19:23 - Holger Just

Target version:	
Description In IssueQuery.default, you can optionally pass a user to get the default query for. We should actually use this user to check the visibility of the user's default query, rather than the implicit User.current. Note that this is not a user-observable issue in Redmine right now, since we never pass an explicit user to IssueQuery.default which is thus always User.current. If we were to pass a different user here, the check might be incorrect though. The attached patch fixes this.
