I would like to add a field separator option to the CSV export option form.

Background:

If I have set the language e.g. to English in my Redmine profile, the separator is taken from `config/locales/en.yml` (general_csv_separator) and it is *comma*. If I have installed e.g. German Microsoft Office and try to open such a CSV, it expects that the separator is *semicolon*. Unfortunately, Microsoft Office doesn't offer to choose the separator prior opening a CSV file and always uses the default value.

It is also related to [#37581](https://redmine.example.com/37581), where many translations have set `general_csv_separator` to different value than is expected in Microsoft Office.

**History**

**#1 - 2022-09-07 08:10 - Go MAEDA**

Is the ability to select decimal separator unnecessary?

I think you need to change the decimal separator to ";" when you change the field separator to ";".

**#2 - 2022-09-12 07:42 - Karel Pičman**

No, you needn't. When the decimal separator is comma, values containing comma are enclosed in apostrophes.

```plaintext
...2022-09-12,"\"2,50\"","2,50",0,2022-09-12 07:37...
```

**#3 - 2022-10-13 06:16 - Go MAEDA**

- Target version set to Candidate for next major release

**#4 - 2022-10-31 05:48 - Go MAEDA**

- Target version changed from Candidate for next major release to 5.1.0

Setting the target version to 5.1.0.
