

Redmine - Patch #37636

Ignore statuses if workflow only defines identity transition

2022-09-01 20:57 - Holger Just

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:	5.1.0		
Description			
<p>When editing workflow transitions, we are implicitly storing identity transitions (from a status to the same status, i.e. <code>old_status_id == @new_status_id</code>). These transition rules are created because the editor renders (disabled) checked checkboxes for those.</p> <p>These transitions however are not removed when</p> <ul style="list-style-type: none">• checking for statuses used by a workflow (which thus causes any statuses which were previously used in a workflow to always be included in the workflows editor, even when "Only display statuses that are used by this tracker" is checked)• as well as when getting a list of statuses in use by a tracker in <code>Tracker#issue_statuses</code> <p>As the checkboxes for the identity transitions are disabled, those statuses can not be removed by admins.</p> <p>The attached patch filters the returned statuses by ignoring the identity transitions and only considering transitions for a status to a different status.</p> <p>Note that for issues, the current status of an issue is generally still allowed. This is ensured by a custom rule for the <code>initial_status</code> in <code>Issue#new_statuses_allowed_to</code>. Thus, the identity transitions are not required to be in the database for this to work.</p>
