Could you split the patch into two parts, reordering and translation updates? (linke [#36493#note-3](#))

Doing two things in one patch makes it difficult to track changes.

OMG! What a hard work! :)
I think there is no change on old translations and I only translated some new entries to persian.
With these description, is it still necessary?

OK, I will do the job.

Thank you. How do you do that? Is there any tools to help do same things?

Hi salman mp, I split your patch into two parts. Could you review it? In particular, I would like you to review the first patch carefully to see if I have broken Persian strings.

No, I don't know such a tool. I did it with my hands and small makeshift scripts.
