<b>Description</b>			
<p>Hello,</p> <p>Microsoft is going to disable IMAP authentication to read emails from Office365. I need to use modern authentication to read/receive emails.</p> <p>Currently, I am using IMAP to receive email into Redmine.</p> <p>[root@redmine-01 config]# rake redmine:email:receive_imap RAILS_ENV="production" host=outlook.office365.com port=993 username=redmine@ipc.org password=Luk92898 unknown_user=accept unknown_user=create --trace ssl=true unknown_user=accept no-permission-check=1</p> <p>Your Gemfile lists the gem redmine_crm (&gt;= 0) more than once.</p> <p>You should probably keep only one of them.</p> <p>Remove any duplicate entries and specify the gem only once.</p> <p>While it's not a problem now, it could cause errors if you change the version of one of them later.</p> <p>(in /var/www/redmine-4.2.2)</p> <ul style="list-style-type: none"><li>• Invoke redmine:email:receive_imap (first_time)</li><li>• Invoke environment (first_time)</li><li>• Execute environment</li><li>• Execute redmine:email:receive_imap</li></ul> <p>rake aborted!</p> <p><b>Net::IMAP::NoResponseError: LOGIN failed.</b></p> <p>/usr/local/rvm/rubies/ruby-2.7.2/lib/ruby/2.7.0/net/imap.rb:1220:in `get_tagged_response'</p> <p>/usr/local/rvm/rubies/ruby-2.7.2/lib/ruby/2.7.0/net/imap.rb:1274:in `block in send_command'</p> <p>/usr/local/rvm/rubies/ruby-2.7.2/lib/ruby/2.7.0/monitor.rb:202:in `synchronize'</p> <p>/usr/local/rvm/rubies/ruby-2.7.2/lib/ruby/2.7.0/monitor.rb:202:in `mon_synchronize'</p>
