

Redmine - Defect #37774

Can't filter the global query by Category

2022-10-13 19:09 - Jon Schell

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues filter	Estimated time:	0.00 hour
Target version:		Affected version:	4.2.1
Resolution:	Duplicate		
Description			
<p>I'm using 4.2.1 and I have this problem. When querying the entire issue list for all projects, I can't filter by category. Also, when filtering a project where that category doesn't exist, the query returns all issues.</p> <p>The expected / desired behavior is that I can query either all projects or just one project with Category as a filter, and if the project doesn't have that category, then it returns no issues.</p> <p>If there's some problem with having the global query not able to use category because it's project-specific, then make a way to have a set of global categories that apply to all projects, in addition to the project-specific ones.</p>
