<b>Description</b>			
On a clean setup one test fails due to error:			
Failure:			
IssuesTest#test_issue_attachments [/home/makurin/Work/redmine/test/test_helper.rb:224]:			
Expected response to be a <3XX: redirect>, but was a <200: OK>			
Log doesn't show exact why but it is a validation error on issue Issue category is not included in the list.			
Reproducing by resetting test database and running tests in single file:			
RAILS_ENV=test TEST=test/integration/issues_test.rb bundle exec rake db:reset test			
After adding issue_categories fixture test passes.
