Description

Hi,
1) Want to know the difference between version 4.2.8 and 5.0.3
2) List of plugin support by both of the version
3) Can we install plugin omniauth_google for v5.0.3, if not can you provide other way or option
https://github.com/twinslash/redmine_omniauth_google

- Note :- Please look into it, as its urgent request

Also when i tried to install omniauth_google for 5.0.3 version got below error

rake aborted!
