History

An error is raised when sending an email notification about one of your commit.

Did you make any change to your config/environments/production.rb? Because no error should be raised by default if the email sending does not work.

For now, you can disable email notifications.

- Status changed from *New* to *Resolved*

Our smtp server could not handle a particular address.

It would be nice to get something better than a broken Redmine however. The way it fails is unacceptable. The exception should be caught and an error put up somewhere, but not break the whole system like it does.

I'm not sure if its related, but this occurs if user is non-existent on SMTP server:

```
Completed 500 Internal Server Error in 1616ms (ActiveRecord: 14.5ms)
```

```
Net::SMTPFatalError (550 User not found: somebody@somewhere.com
```

```
