

## Redmine - Defect #37986

### postgresql 15: additional steps required while initializing database

2022-12-01 13:35 - Tomas D

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Documentation	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	5.0.3
<b>Resolution:</b>			
<b>Description</b>			
<p>I tried to install on alpine/edge with clean postgresql 15 setup. Errors were produced while initializing database:</p>			
<pre>prod1:~/redmine\$ RAILS_ENV=production bundle exec rake db:migrate rake aborted! ActiveRecord::StatementInvalid: PG::InsufficientPrivilege: ERROR: permission denied for schema public LINE 1: CREATE TABLE "schema_migrations" ("version" character varyin...</pre>			
<p>While following installation step 2 (<a href="https://www.redmine.org/projects/redmine/wiki/RedmineInstall#PostgreSQL">https://www.redmine.org/projects/redmine/wiki/RedmineInstall#PostgreSQL</a>), I had to use additional commands in postgresql:</p>			
<pre>\c redmine postgres grant all on schema public to redmine</pre>			
<p>source: <a href="https://www.cybertec-postgresql.com/en/error-permission-denied-schema-public/">https://www.cybertec-postgresql.com/en/error-permission-denied-schema-public/</a></p>			
<p>Only then</p>			
<pre>RAILS_ENV=production bundle exec rake db:migrate</pre>			
<p>worked as expected.</p>
