

Redmine - Defect #37989

Error on "bundle install" when fetching zeitwerk on Redmine 5.0.4 upgrade

2022-12-01 23:09 - Fernando Hartmann

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Marius BĂLTEANU	% Done:	0%
Category:	Gems support	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

Running bundle install trying to upgrade Redmine 5.0.3 to 5.0.4 generates the following error

```
bundle install --without test development

Fetching gem metadata from https://rubygems.org/.....
Fetching gem metadata from https://rubygems.org/.
Resolving dependencies.....
Using rake 13.0.6
Using concurrent-ruby 1.1.10
Using il8n 1.10.0
Using minitest 5.15.0
Using tzinfo 2.0.5
Fetching zeitwerk 2.6.6
ArgumentError: wrong number of arguments (given 4, expected 1)
An error occurred while installing zeitwerk (2.6.6), and Bundler cannot continue.
Make sure that `gem install zeitwerk -v '2.6.6' --source 'https://rubygems.org/'` succeeds before bundling.

In Gemfile:
  rails was resolved to 6.1.7, which depends on
    actioncable was resolved to 6.1.7, which depends on
      actionpack was resolved to 6.1.7, which depends on
        actionview was resolved to 6.1.7, which depends on
          rails-dom-testing was resolved to 2.0.3, which depends on
            activesupport was resolved to 6.1.7, which depends on
              zeitwerk
```

History

#1 - 2022-12-03 12:42 - Marius BĂLTEANU

- Status changed from New to Needs feedback

It works on my environment with Ruby 3.0, please see the logs below.

What version of Ruby do you use?

```
root@7b37c85e3ac2:/work# bundle install --without test development
[DEPRECATED] The `--without` flag is deprecated because it relies on being remembered across bundler invocations, which bundler will no longer do in future versions. Instead please use `bundle config set --local without 'test development'`, and stop using this flag

```

```
$ rails -v
Rails 6.1.7
```

#3 - 2022-12-03 14:21 - Marius BĂLTEANU

- Subject changed from Error on "bulndle install" whem fetching zeitwerk on Redmine 5.0.4 upgrade to Error on "bundle install" when fetching zeitwerk on Redmine 5.0.4 upgrade

#4 - 2022-12-03 14:33 - Marius BĂLTEANU

It works also on Ruby 2.5.1 in my environment.

Some ideas:

- It could be related to the "psych" gem version. Which is in your case?
- "gem install zeitwerk -v '2.6.6' --source 'https://rubygems.org/'" what error returns?

```
root@b52161230a89:/work# ruby -v
ruby 2.5.1p57 (2018-03-29 revision 63029) [aarch64-linux]
```

```
root@b52161230a89:/work# rails -v
Rails 6.1.7
```

```
root@b52161230a89:/work# bundle install
The dependency tzinfo-data (>= 0) will be unused by any of the platforms Bundler is installing for. Bundler is installing for ruby but the dependency is only for x86-mingw32, x64-mingw32, x86-mswin32. To add those platforms to the bundle, run `bundle lock --add-platform x86-mingw32 x64-mingw32 x86-mswin32`.
The dependency ffi (>= 0) will be unused by any of the platforms Bundler is installing for. Bundler is installing for ruby but the dependency is only for x86-mingw32, x64-mingw32, x86-mswin32. To add those platforms to the bundle, run `bundle lock --add-platform x86-mingw32 x64-mingw32 x86-mswin32`.

Post-install message from html-pipeline:
-----
Thank you for installing html-pipeline!
You must bundle Filter gem dependencies.
See html-pipeline README.md for more details.
https://github.com/jch/html-pipeline#dependencies
-----
Post-install message from rubyzip:
RubyZip 3.0 is coming!
*****
```

The public API of some Rubyzip classes has been modernized to use named parameters for optional arguments. Please check your usage of the following classes:

- * `Zip::File`
- * `Zip::Entry`
- * `Zip::InputStream`
- * `Zip::OutputStream`

Please ensure that your Gemfiles and .gemspecs are suitably restrictive to avoid an unexpected breakage when 3.0 is released (e.g. ~> 2.3.0). See <https://github.com/rubyzip/rubyzip> for details. The Changelog also lists other enhancements and bugfixes that have been implemented since version 2.3.0.

Can you try removing both psych gem versions in order to run the bundle install? I think it should be "gem uninstall psych".
