

Redmine - Defect #38

Can't view project settings. Unidentified field identifier in views/project/_form.rhtml

2007-04-09 10:43 - Laran Evans

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution:	
Description	
<p>ActionView::TemplateError (undefined local variable or method `identifier' for #<Project:0x41117880>) on line #12 of app/views/projects/_form.rhtml: 9: <% end %></p> <p>For me line 12 reads:</p> <pre><p><%= f.text_field :identifier, :required => true, :size => 15, :disabled = @project.identifier_frozen? >
<= l(:text_length_between, 3, 12) %> <%= l(:text_project_identifier_info) unless @project.identifier_frozen? %>< </p></pre>	

History

#1 - 2007-04-09 14:21 - Jean-Philippe Lang

This field (identifier) was added recently.
Make sure you have migrated your database.

#2 - 2007-04-10 16:54 - Pavol Murin

I suppose you are running the svn version. Looks like you didn't
do rake db:migrate.

(remember to run it for the correct database - e.g. rake db:migrate
RAILS_ENV=production

muro

#3 - 2007-04-10 17:21 - Laran Evans

Perfect. That worked. Thanks.

#4 - 2008-02-03 11:23 - Jean-Philippe Lang

- Subject changed from Can't view project settings. Unidentified field ":identifier" in views/project/_form.rhtml to Can't view project settings. Unidentified field identifier in views/project/_form.rhtml
