Target version:			
Resolution:	Duplicate		
Description <p>It would be nice if you could somehow provide a link in your time log entry back to a revision in the SCM. Most of the time (on dev projects), time is updated when code is checked in. You can provide a link to the task in question in the commit log, but you can't link back when recording your time.</p> <p>Basically just something along the lines of "See Commit X", where X is rendered as a link back to the SCM for the project the task belongs to.</p>

Just an update, if the revision notation of

```
r0000 --- where 0000 is the revision in the SCM to link to
```

Worked in the timelog comments the way it does everywhere else, that would be perfect :D

- Category deleted (Time tracking)
- Status changed from New to Closed

Closed as a dup of issue [#202](#). To keep the tracker clean of duplicates and sort-a-likes... ;)
