

Redmine - Patch #3815

Format links in Timelog

2009-09-03 17:28 - Alex Bevilacqua

Status: Closed	Start date: 2009-09-03
Priority: Normal	Due date:

Target version:	
Description This addresses the issue I reported earlier (#3810). I'm not running this on a *nix system, so I don't have diff/patch available atm (though I could just install winmerge I guess :P). <code>/app/views/timelog/_list.rhtml</code> 26: <code><td class="comments"><%= textilizable entry.comments %></td></code> That's it :D	
Related issues:

I support this "patch". Personally I'd like to see textilisation of the timelog entries' descriptions too.

Any other opinions?

#2 - 2009-09-18 03:27 - Alex Bevilacqua

I think textilisation of the descriptions is a good idea. (and next time i submit a patch, i'll make sure it's actually a patch :P)

#3 - 2009-10-01 00:05 - Eric Davis

- Category set to Time tracking
- Status changed from New to 7
- Assignee set to Eric Davis

This would be a good addition.

We might need to start looking at the performance of textilizable soon, my performance statistics are showing a lot of time spent in rendering. Would probably be good to profile post 0.9.

There needs to be some restriction on what it outputs though. I personally use a lot of headers when adding comments which would look quite awkward in the timelog.

Since Redmine is a tool many will use at the same time textile takes it's time, therefor a lot of projects textiles the content into html that gets saved in

a different column in the database table. It's a thought.

Agree. I opened [#4482](#) for this with my thoughts.

#6 - 2010-03-22 21:11 - Mischa The Evil

- *Category deleted (Time tracking)*
- *Status changed from 7 to Closed*
- *Assignee deleted (Eric Davis)*

This actually is a partly duplicate of issue [#202](#). Therefor and to keep the tracker clean I'll close this one...
