Target version:	5.0.5	Affected version:	
Resolution:	Fixed		
Description			
Running db:migrate using sql schema format shows the deprecation warning:			
DEPRECATION WARNING: Using `bin/rails db:structure:dump` is deprecated and will be removed in Rails 7.0. Configure the format using `config.active_record.schema_format = :sql` to use `structure.sql` and run `bin/rails db:schema:dump` instead. (called from block (3 levels) in <top (required)> at lib/tasks/redmine.rake:160)			
Redmine invokes db:schema/structures:dump to dump plugins migrations.

I guess we need to provide backward compatibility for Rails 6.1.
db:structure:dump will be removed only in Rails 7.0 but the current trunk works on 6.1+.

I think the first patch work with Rails 6.1. It seems that db:schema:dump generates db/structure.sql also with Rails 6.1.

```
$ rm db/structure.sql
ls db/structure.sql
ls: db/structure.sql: No such file or directory
$ bin/rake redmine:plugins:migrate
$ ls db/structure.sql
db/structure.sql
```
