Target version:		Affected version:	
Resolution:	Fixed		
Description r22038 added the 20221214173537_add_select_project_publicity_permission.rb migration file. However, it is versioned as a Rails/AR 5.2 migration while at the time of the commit the trunk was already on Rails 6.1. I'm not sure if this was done for a specific purpose nor if changing this retroactively will cause other issues. But I thought it would at least be good to report it here as such.

Revision 22074 - 2023-01-25 02:57 - Go MAEDA

Fix the migration version of 20221214173537_add_select_project_publicity_permission.rb (#38048, #38210).

History

#1 - 2023-01-24 14:03 - Go MAEDA

Thank you for pointing this out. This was my mistake and I should have changed the version to 6.1 before committing.

I think it is safe to change [source:trunk/db/migrate/20221214173537_add_select_project_publicity_permission.rb](#) to update the version from 5.2 to 6.1 because the code in the migration is a simple Rails code and the behavior does not change depending on the version of Migration.

Yeah, just updating this will probably be fine as there is no DDL involved in the migration (and even then, it would likely be okay).

#4 - 2023-01-25 02:57 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

Fixed the migration version. Thank you.
