<b>Resolution:</b>	Fixed		
<b>Description</b> <p>Property changes tab of an issue is supposed to be displayed when the issue has journals with property changes. However, the tab is not displayed when all journals of the issue have both notes and property changes. The screenshots below describe the issue.</p> <p>There are two journals, both containing notes and property changes. But "Property changes" tab is not displayed: screenshot-20230128-1.png</p> <p>A third journal has been added. It has no notes, only property changes. After adding the third journal, Property changes tab appears: screenshot-20230128-2.png</p> <p>At this point, Property changes tab displays all three journals. While Property changes tab displays all three journals with or without notes, the tab itself is only displayed when there are journals that do not contain notes but only property changes: screenshot-20230128-3.png</p>
