

Redmine - Feature #3824

add versions or releases for projects

2009-09-04 21:04 - Alex Last

Status:	Closed	Start date:	2009-09-04
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Resolution:	Duplicate		
Description 1. add "version" or "release" feature, like in Jira. 2. add "affected version" and "to fix version" for issues 3. add "roadmap/by versions" and "changes list for version/release" pages Jira is a very good example how this functionality can look like. Very convenient interface.			
Related issues: Is duplicate of Redmine - Feature #3000: New issue - Affected version droplist

- Status changed from New to Closed
- Resolution set to Invalid

Project versions are already implemented.
See how it works and look for the existing improvement requests.

Jira is a very good example how this functionality can look like. Very convenient interface.

We are running trunk version, and I cant see how I can det the affected version for a given issue, specially a issue with the tracker "bug" should be assigned to a version where the bug is found ratrher then the target version where the bug should be fixed. If you have this functionality please advise me how to use it.

Holger

#3 - 2009-11-13 11:27 - Jean-Philippe Lang

- Status changed from Reopened to Closed
- Resolution changed from Invalid to Duplicate

Then dup of [#3000](#).
