

Redmine - Defect #38242

Show negative values with Textile

2023-02-03 10:01 - thuruk thuruk

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Wont fix		

Description

I encountered this problem while make a list like this :

- Item 1 had a temperature of 12°C
- Item 2 had a temperature of ~~12°C~~
- Item 3 had a temperature of -12°C

As you can see, the minus value gets interpreted as a strike-out. This doesn't make much sense at first glance, as you would expect the return to line to prevent this as it is a clear visual demarcation.

History

#1 - 2023-02-07 19:14 - Holger Just

This is likely an artifact of the textile parsing where the strike-through has higher precedence than the lists.

As a workaround, you may use

- * Item 2 had a temperature of -12°C
- * Item 3 had a temperature of -12°C

rather than

- Item 2 had a temperature of -12°C
- Item 3 had a temperature of -12°C

from your example. These bullet characters are also generated by the bullet list button above the texfield. With the bulleted list, this gets rendered as

- Item 2 had a temperature of -12°C
- Item 3 had a temperature of -12°C

#2 - 2024-11-15 08:31 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Wont fix
