

Redmine - Patch #38360

Do not apply table-layout:fixed in potentially wide tables of detailed issue reports

2023-03-15 14:53 - Holger Just

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	UI - Responsive	Estimated time:	0.00 hour
Target version:	5.1.0		
Description			
In the detailed issue reports (e.g here), the table can become very wide if there are a lot of statuses. As the table is marked as class=issue-report, it is rendered with			
<pre>table.issue-report { table-layout: fixed; }</pre>			
This results in the table columns to overlap if there are a lot of statuses. One can just barely observe the issue even on redmine.org when reducing the width of the browser window on the above linked page.			
The attached patch changes the class of the table in the detailed reports to render the table with a default table layout instead, so that the table is readable even with a lot of statuses. The patch was extracted from Planio
