

Redmine - Feature #38372

Use Commonmarker instead of Redcarpet by default when rendering Markdown attachments

2023-03-22 01:51 - Mizuki ISHIKAWA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:			
Resolution:	Fixed		
Description markdown_formatter returns 'common_mark' only when text_formatting is common_mark, and 'markdown' otherwise. For example, when you attach an markdown.md file and preview it in an environment where text_formatting is Textile, the contents of the file are converted to HTML by RedCarpet('markdown'). Since RedCarpet('markdown') was deprecated in #36807 , why not change markdown_formatter to return 'markdown' only when text_formatting is markdown and 'cmmon_mark' otherwise?
