

## Redmine - Feature #3841

### Interface with fbConnect/Twitter/etc

2009-09-10 01:50 - Michael Koch

<b>Status:</b>	New	<b>Start date:</b>	2009-09-10

<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> In terms of usability, it'd be great if there was a plugin that allowed users to login using their facebook/twitter/openid or other account that the user would like to use. This would help in lifting an additional barricade to user adoption of redmine.			

### History

#### #1 - 2009-09-10 03:06 - Eric Davis

Redmine supported OpenID ([#699](#)) already. I'm not sure of the value of allowing Facebook or Twitter authentications. Perhaps someone could build a plugin to support these authentication types.

#### #2 - 2009-09-11 01:40 - Michael Koch

In terms of reaching a larger user base, having multiple routes to login into redmine seems useful. Maybe not?

#### #3 - 2009-09-12 06:31 - Eric Davis

I could see those being useful, but not as a core feature. If they were built as a plugin that could be installed, I'd be happy to help the developer if they some core modifications. What does everyone else think?

#### #4 - 2009-09-14 23:26 - Michael Koch

i agree that as a plugin, it would be great. unfortunately, i am not a programmer, but hopefully someone out there has the expertise to do this.

#### #5 - 2009-09-24 10:32 - Anh Kỳ Huỳnh

I am going to write this plugin. I may publish it this weekend. If you intend to write or request for features, please comment here.

#### #6 - 2009-09-24 23:06 - Michael Koch

When logging in, it'd be nice to have a drop down menu from which you could choose the site you want to login thru.

Found this site that seems to have a good tutorial on how to do it.

Hello Ky,

I was wondering what the current status of this plugin is?

Thanks!  
Mike

Not fbConnect/twitter but something you can check here:

1. [OpenId Selector](#)
2. [OpenID Fix](#)
3. [Redmine omniauth google](#)
4. [Google Apps login](#)
